

BidFlow

TENDER COMMAND CENTER

User Manual

Everything your team needs to manage tenders, PQQs and proposals in BidFlow — from signing in and tracking live bids, to team notifications, change history and Excel import / export.

Version 1.0 · June 2026 · SATCO Business Development

All amounts are shown in **SAR**. The dashboard is the source of truth — Excel is an import/export output.

Contents

- 01** Welcome — what BidFlow is
- 02** Signing in & your account
- 03** Home dashboard
- 04** Command Center (pipeline board)
- 05** Opportunities table — edit, filter, saved views
- 06** The opportunity page
- 07** Important changes — notifying the team
- 08** Closing an opportunity — the reason is required
- 09** Change History — who changed what, when
- 10** Excel Sync — CSV & styled Excel
- 11** Calendar & reminders
- 12** Users, roles & permissions (Admin)
- 13** Notification rules (Admin)
- 14** Quick reference & FAQ

01 Welcome — what BidFlow is

BidFlow Tracker replaces the shared Excel proposal tracker with one live workspace for the whole BD team. Every opportunity — bid, PQQ, RFQ, EOI — lives on the dashboard, moves through the pipeline, and is edited by the team in real time. Excel hasn't gone away: you can **export** a ready-made tracker (CSV or the styled SATCO template) at any time, and **import** one back in.

The pipeline

Every opportunity has a **status** that places it in one of these stages:

The golden rules

- **The dashboard is the source of truth.** Everything you edit is saved instantly to the database.
- **Every change is recorded.** Change History shows who changed what, when, and old → new values.
- **Important changes ask before saving.** Deadline, status and bond changes prompt you to notify the team.
- **Closing always needs a reason.** You cannot close, cancel or postpone a bid without saying why.
- **All money is SAR.**

Tip — Press **Ctrl + K** anywhere to search, or **N** to add a new opportunity.

02 Signing in & your account

Open the BidFlow web address. If you are not signed in, you will see the sign-in screen.

- 1 Enter your **work email** (e.g. `layla.haddad@satco.example`).
- 2 Enter your password. New accounts start with the temporary password `bidflow123` .
- 3 Click **Sign in**. You land on your Home dashboard, greeted by name.

Signing out

Click the **sign-out icon** next to your name at the bottom of the left sidebar.

Important — ask your Admin to change your temporary password after your first sign-in (Settings → Users → your row → set a new password).

03 Home dashboard

Home is your morning briefing: how many bids are live, what is due this week, what needs chasing.

- **KPI cards** — Live Bids (with SAR pipeline value), Live PQQ/RFQ, Due this week, Overdue follow-ups, Submitted this month, Awarded this year, Closed/Lost, Win rate. **Click any card** to open that list.
- **Today's Focus** — bids due soon, last day for questions, upcoming site visits.
- **Pipeline snapshot** — count of opportunities per stage; click **Open** for the board.
- **Quick buttons** — Add Opportunity, Add Follow-up, Weekly Report, Import Excel.

04 Command Center (pipeline board)

The board shows every opportunity as a card in its pipeline stage — like a Kanban board for tenders.

- 1 **Drag a card** to another column to change its status.
- 2 Dragging into **Closed / Lost** asks for a closing reason first (see section 08).
- 3 Important moves (e.g. into Submitted or Awarded) ask whether to notify the team (see section 07).
- 4 Click a card to open the full opportunity page.

05 Opportunities table — edit, filter, saved views

The master list of every opportunity, modelled on the old Excel tracker — but live and shared.

Editing directly in the table

- 1 Click any cell (status, priority, owner, dates, value...) to edit it in place.
- 2 Pick or type the new value — it saves the moment you leave the cell.
- 3 Open the full page by clicking the **SATCO Ref** or the title.

Finding things

- **View tabs** — All, Live bids, Due this week, PQQ/RFQ, Submitted, **My work** (only opportunities you own).
- **Search** by title, reference or client; filter by status; group by status / client / owner / classification.
- **Columns** menu — show or hide any column.

Saved views

- 1 Set up the filters, grouping, sorting and columns you like.
- 2 Click **Saved views** → **type a name** → **Save**.
- 3 Your view is stored to your account — reopen it any time from the same menu, on any device.

06 The opportunity page

One page with everything about a tender. **Click any value to edit it** — there is no separate edit mode.

The screenshot shows the BidFlow 'Opportunities' page. The left sidebar contains navigation links for Workspace (Home, Command Center, Opportunities), Pipeline (Live Bids, Live PQQ / RFQ, Submitted & Negotiation, Awarded, Closed / Lost), and Organize (Calendar, Clients & Portals, Change History, Excel Sync, Reports, Settings). The main content area is titled 'Opportunities' and shows a list of opportunities. The selected opportunity is 'Al Wasl Interchange — Civil & Structural Works'. The page displays a health score of 92, quick actions (Mark Submitted, Move to Negotiation, Mark Awarded, Mark Closed / Lost), reminders (Technical review), key dates (Question deadline, Bid due, Bond expiry), and risk indicators (Submission deadline imminent, Critical priority bid). The 'Overview' section shows details like Reference (SATCO-2026-0142), Client (Roads & Transport Authority), Procurement (Open Tender), Owner (Layla Haddad), Reviewer (Elena Petrova), and Estimated Value (SAR 48,500,000). The 'Dates & Deadlines' section shows RFP received (12 May 26), Site visit (26 May 26), Question deadline (2 Jun 26), Bid due (6 Jun 26), and Submission (Next follow-up).

Health score 92 Healthy All key fields complete.

QUICK ACTIONS

- Mark Submitted
- Move to Negotiation
- Mark Awarded
- Mark Closed / Lost

REMINDERS + Add

- Technical review — Al Wasl Int... 5 Jun 16

KEY DATES

- Question deadline 2d ago
- Bid due in 2d
- Bond expiry in 185d

RISK INDICATORS

- Submission deadline imminent
- Critical priority bid

- **Overview** — reference, client, portal, classification, status, owner, reviewer, value (SAR), partner.
- **Dates & Deadlines** — RFP received, site visit, question deadline, bid due (+ time), submission, follow-ups.
- **Commercial & Bid Bond** — bond required, %, validity days, expiry date.
- **Documents & Links** — links to the RFP package, BOQ, proposals (files stay in your folders).
- **Activity & Changes** — this opportunity's own change history.

Right-hand panel

- **Health score** — flags missing key fields (owner, reviewer, bid due, value...).
- **Quick actions** — Mark Submitted · Move to Negotiation · Mark Awarded · Mark Closed/Lost.
- **Reminders & key dates** — add reminders that also appear on the Calendar.
- **Risk indicators** — automatic warnings (deadline imminent, no owner, bond missing...).

Tip — to add a brand-new opportunity press **N**, or click **+ New opportunity** (top-right). The form covers all tracker fields; the reference number is auto-generated if you leave it blank.

07 Important changes — notifying the team

Some edits matter to everyone: bid due dates, question deadlines, status moves to Submitted / Awarded / Closed, results, and bid-bond changes. When you make one, BidFlow asks **before saving**:

- 1 Check the summary — it shows exactly what changes, old → new.
- 2 **Notify all team members** is selected by default. Or choose **Select specific recipients** and tick people (grouped by team).
- 3 Optionally add a short note for context.
- 4 Click **Confirm change & send** — the change is saved and the email goes out.
- 5 Or click **Cancel change** — **nothing is saved and no email is sent**.

Some changes also offer **Save without email** (your Admin controls which — see section 13). Normal edits (notes, portal, classification...) never show this dialog; they just save.

Tip — the change is always included in the next Excel export, and the email status (sent / to whom) is recorded in Change History.

08 Closing an opportunity — the reason is required

Whenever a bid is moved to **Closed Lost, Cancelled, No-Go or Postponed** — from the table, the page, the quick actions or the board — BidFlow asks for the real reason first:

- 1 Pick a **reason category** (Commercially not competitive, Lost to competitor, Client cancelled, ...).
- 2 Add notes — lessons learned, the competitor, the price gap.
- 3 Click **Save reason & close**. (Closing is an important change, so the notify dialog follows.)

The stored reason then shows on the **Closed / Lost** page — hover for the notes:

09 Change History — who changed what, when

Open **Change History** in the sidebar for the full audit trail, written in plain language — e.g. “Layla Haddad changed Status from Live Bid to Submitted for SATCO-2026-0142.”

The screenshot displays the BidFlow 'Change History' interface. The left sidebar shows the navigation menu with 'Change History' selected. The main content area is titled 'Change History' and includes a summary of changes today, important changes, emails sent, Excel imports/exports, and failed actions. Below this are tabs for 'All changes', 'My changes', 'Important', 'Status changes', 'Deadline changes', 'Excel activity', 'Emails sent', 'Failed actions', and 'Deleted / archived'. A search bar and filters for users, actions, importance, and sources are also present. The list of changes shows three entries: 'Edit SATCO-2026-0142' (Contract duration set to 30 months), 'Excel export' (updated Excel tracker with 23 opportunities), and 'Closed reason' (set Closed/Lost reason to Lost to competitor for SATCO-2026-0151). Each entry includes a timestamp and a 'Details' link.

Summary cards

Excel Sync

Your dashboard is the working system. Export a ready-to-use styled tracker, or import an updated one — Excel is never the database.

CONNECTED TEMPLATE: SATCO Proposal Management Tracker.xlsx

ROWS IN DASHBOARD: 23

ROWS LAST EXPORTED: 23

PENDING CHANGES SINCE EXPORT: 1

LAST EXPORT: 11 Jun · 08:23

LAST IMPORT: —

EXPORT STATUS: Exported successfully

FAILED IMPORTS / EXPORTS: 0

Export CSV | Import CSV or Excel | Export styled Excel

CSV is the simplest, most reliable format — opens in Excel, Google Sheets or any editor. The styled Excel option fills the SATCO template across its sheets.

RECENT EXCEL ACTIVITY

Layla Haddad exported the updated Excel tracker with 23 opportunities.	11 Jun · 08:23
System Admin exported the updated Excel tracker with 23 opportunities.	9 Jun · 09:38
System Admin exported the updated Excel tracker with 23 opportunities.	9 Jun · 09:19
System Admin exported the updated Excel tracker with 23 opportunities.	9 Jun · 09:19
System Admin exported the updated Excel tracker with 22 opportunities.	1 Jun · 20:00

Nayla Haddad
Proposal Manager

Exporting

- 1 **Export CSV** (recommended) — one clean file with every opportunity. Opens perfectly in Excel and Google Sheets. Values in SAR, people and clients by name.
- 2 **Export styled Excel** — fills the official SATCO tracker template: Live Bids, Live PQQ, Submitted Bid-Negotiation, Closed Bids, Awarded Bids, Submitted PQQs and RFQs — colours and formatting preserved. Each opportunity lands on the right sheet automatically.

Importing

- 1 Click **Import CSV or Excel** and choose your file (.csv or .xlsx).
- 2 Review the **preview**: rows marked **New** or **Update**, with counts and “Needs review” warnings (e.g. an unknown client name). Nothing is changed yet.
- 3 Click **Apply import** to bring the data in — or **Cancel** to discard everything.

The status cards show rows in the dashboard, last export/import time, and **pending changes since the last export** — so you always know if your Excel copy is stale.

Tip — rows are matched by **SATCO Reference**: same reference = update, new reference = new opportunity.

11 Calendar & reminders

The Calendar shows every deadline (bid due, question deadline, site visits, bond expiry) plus your own reminders.

> Notification rules

Notification rules

Choose which changes are important enough to ask “Notify Team?” before saving, and which may be saved without an email.

CHANGE	ASK TO NOTIFY	ALLOW SAVE W/O EMAIL
Bid due date changed		
Question deadline changed		
Status changed (Submitted / Awarded / Closed)		
Result changed		
Closed / Lost reason changed		
Bid bond percentage changed		
Bid bond expiry changed		
Bid bond validity changed		
Owner removed / unassigned		

When “Ask to notify” is on, editing that field opens the Important Change confirmation. With it off, the change saves silently and is still recorded in Change History.

- **Ask to notify** — on: editing that field opens the notify dialog. Off: it saves silently (still recorded in Change History).
- **Allow save w/o email** — adds the “Save without email” button to the dialog for that field.

14 Quick reference & FAQ

I want to... → do this

I want to...	Do this
Add a new tender / PQQ	Press N or click + New opportunity
Change a deadline	Click the date on the table or the opportunity page → confirm the notify dialog
Move a bid to Submitted	Quick action Mark Submitted , or drag the card, or edit Status
Close a lost bid	Mark Closed / Lost → choose the reason → confirm
See who changed something	Sidebar → Change History (or the opportunity's Activity & Changes)
Get the tracker as Excel	Sidebar → Excel Sync → Export CSV or Export styled Excel
Bring an updated tracker in	Excel Sync → Import CSV or Excel → review preview → Apply
Save my favourite filters	Opportunities → Saved views → name → Save
Add a teammate	(Admin) Settings → Manage users → Add user
Edit dropdown options	(Admin) Settings → Lists (portals, classifications, reasons...)

FAQ

- Did my edit save?** Yes — edits save the moment you leave the field and a toast confirms it. Important changes save only after you confirm the dialog; cancelling saves nothing.
- Why am I asked for a reason when closing?** So the Closed/Lost page and reports always show the real, recorded reason — it is never guessed or auto-generated.
- Why did a dialog appear for my edit?** The field is marked “important” in the notification rules. Confirm to save and notify, or cancel to discard.
- Are the notification emails real?** They are recorded and shown as “Sent (demo)” until the email service is connected by your administrator. Everything else works the same.
- Can I break the Excel template?** No — the export fills a fresh copy of the official template every time. Your dashboard data is never affected by exporting.
- I can’t see the Delete button.** Your role doesn’t have the delete/archive permission — ask an Admin.

Keyboard shortcuts — **Ctrl + K** search everything · **N** new opportunity · **Esc** close any dialog.
